L.E.D. DOWNLIGHTER SERIES

THE ALTERNATIVE TO COMPACT FLUORESCENT LUMINAIRES

L.E.D. DOWNLIGHTERS

The Lighting Projects down lights offer a 21st century alternative to Compact Fluorescent Luminaires. With instant light output at 100%, lower energy consumption and over five times the lamp life, the Lighting Projects Down lighter Series provides a stylish and highly energy efficient light source that will provide years of maintenance free illumination.

FEATURES:

- Long Life > 50,000 hours
- Fully Dimmable
- Low Energy Consumption
- No Heavy Metal Content
- No projected heat or UV
- Emergency Option available

APPLICATIONS

- Office Lighting
- Corridors
- Toilets and Washrooms
- Hotels
- Hospitals
- Retail Stores

A natural replacement to compact fluorescent luminaires, Lighting Projects down lighters are a fully recessed, advanced performance, 'white light' LED luminaire series, designed for any installation where high light levels are desirable or task determined.

As their light source, Lighting Projects LED Down lighters utilise the most up-to-date high power 1W LEDs, delivering colour temperatures and luminance levels either equal or superior to conventional fluorescent sources.

Lighting Projects down lighters greatly reduce running and maintenance costs compared to compact fluorescent luminaires, which combined with the lower power requirement and the minimal heat emitted by the LEDs wasting virtually no energy as heat — results in reduced energy costs, which in a carbon footprint aware World also means lower CO2 emissions.

TECHNICAL DATA

	Europa 200	Europa 250	Europa ADJ 180
Light Source	10 x 1 watt LED	20 x 1 watt LED	10 x 1 watt LED
